

# Ivar Display Condensed

Designed by  
Göran Söderström

Published  
September 2019

Ivar began with the idea of creating a serif companion for Siri. During its development, it became apparent that typographic siblings don't necessarily need to have a uniform design. After three years of drawing and perfecting the letterforms, the only shared characteristics that remain are the shapes of the terminals.

Rather than being a revival, Ivar is strongly influenced by the grace and sturdy construction of Times. The typeface stands on the shoulders of giants: the design refers to the dependable text faces from the mid-1900s, which in turn were rooted in classic designs from the 16th and 17th century.

This is a condensed version of Ivar Display, available in 6 weights. It was first created for the redesign of *Tidskriften Arkitektur* by Malmsten Hellberg and now available for retail.
